

CUSTOMER CHURN ANALYSIS

LEADERSHIP PRESENTATION

Objective

Identify top three focus areas responsible for customer churn and recommend strategic actions to improve customer retention.

Approach

- SQL based customer churn analysis.
- Customer segmentation & summary statistics.
- Business-Focused interpretation of insights.

Top Focus Areas

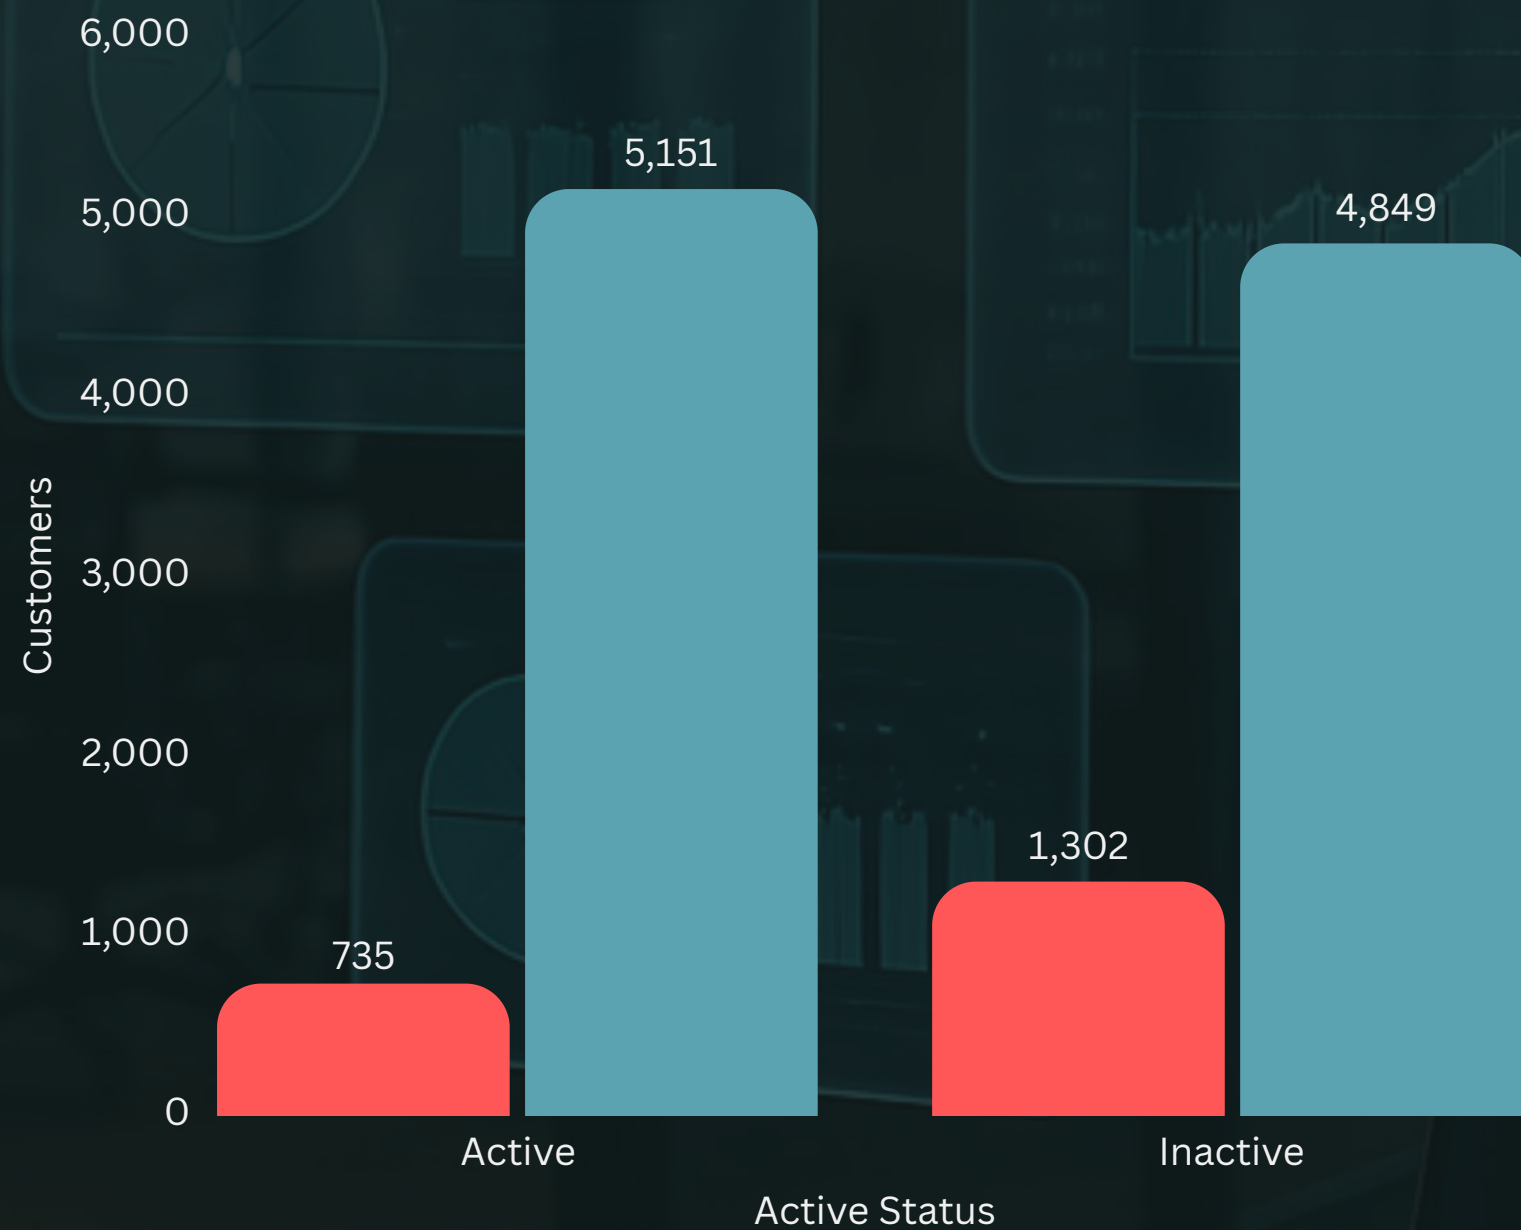

Improve Customer Engagement

Active Status vs Churn

● Exit customers ● Total Customers

Key Finding

Inactive customers showed significantly higher churn compared to active customers.

Recommended Actions

- Launch personalized engagement campaigns.
- Introduce loyalty & reward programs.
- Improve mobile banking engagement.
- Increase customer communication touchpoints.

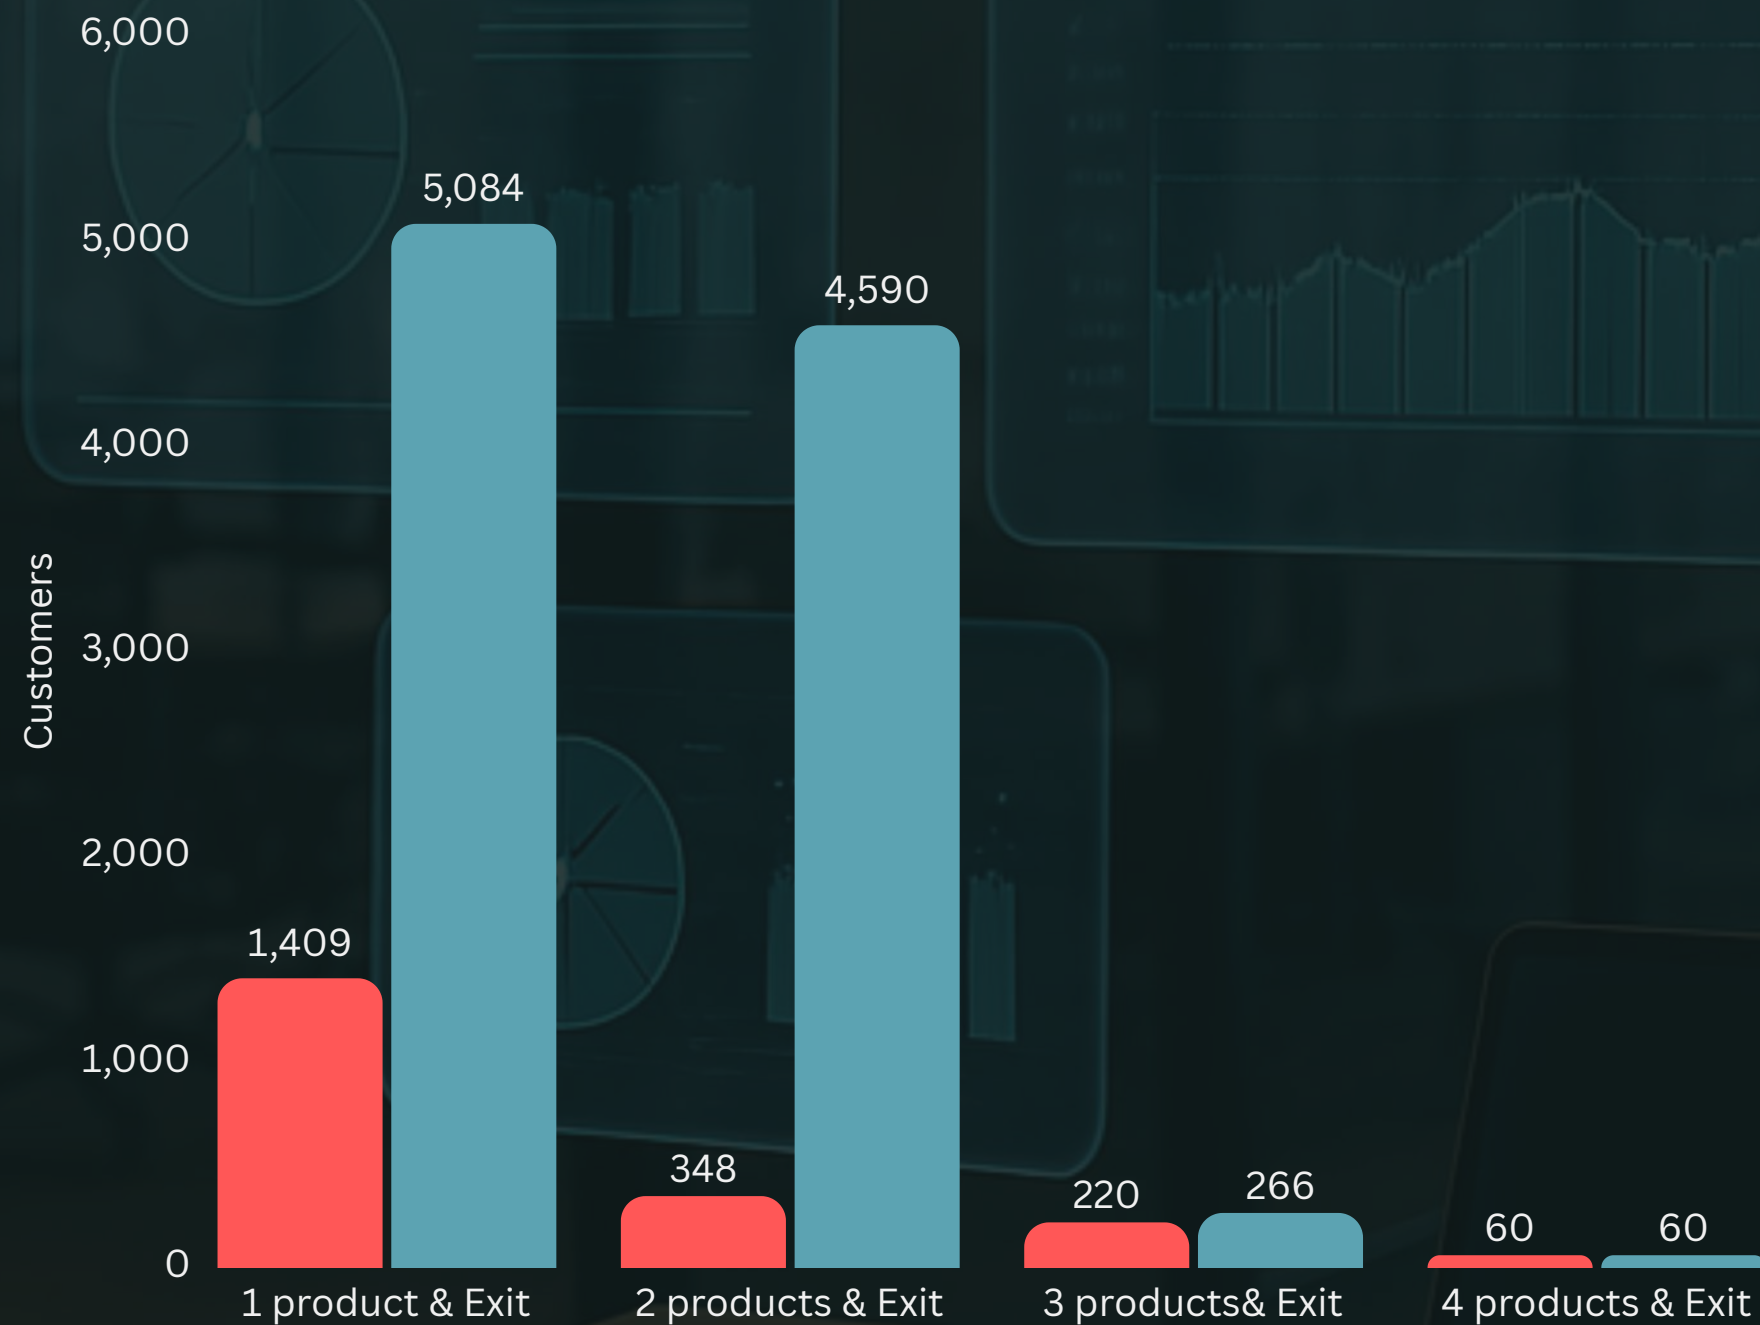

2 Top Focus Areas

Increase Product Adoption

Number of products Analysis

● Exit customers ● Total Customers

Key Finding

Customers with fewer banking products showed higher churn probability.

Recommended Actions

- Implement cross selling strategies.
- Promote multi-product customer programs.
- Provide personalized product recommendations.
- Create bundle banking service offers.

Top Focus Areas

Retain High-Value Customers

Avg Balance By Exit Status

100,000

91,109

50,000

0

YES

72,745

NO

Key Finding

Some customers with high account balances still exited the bank.

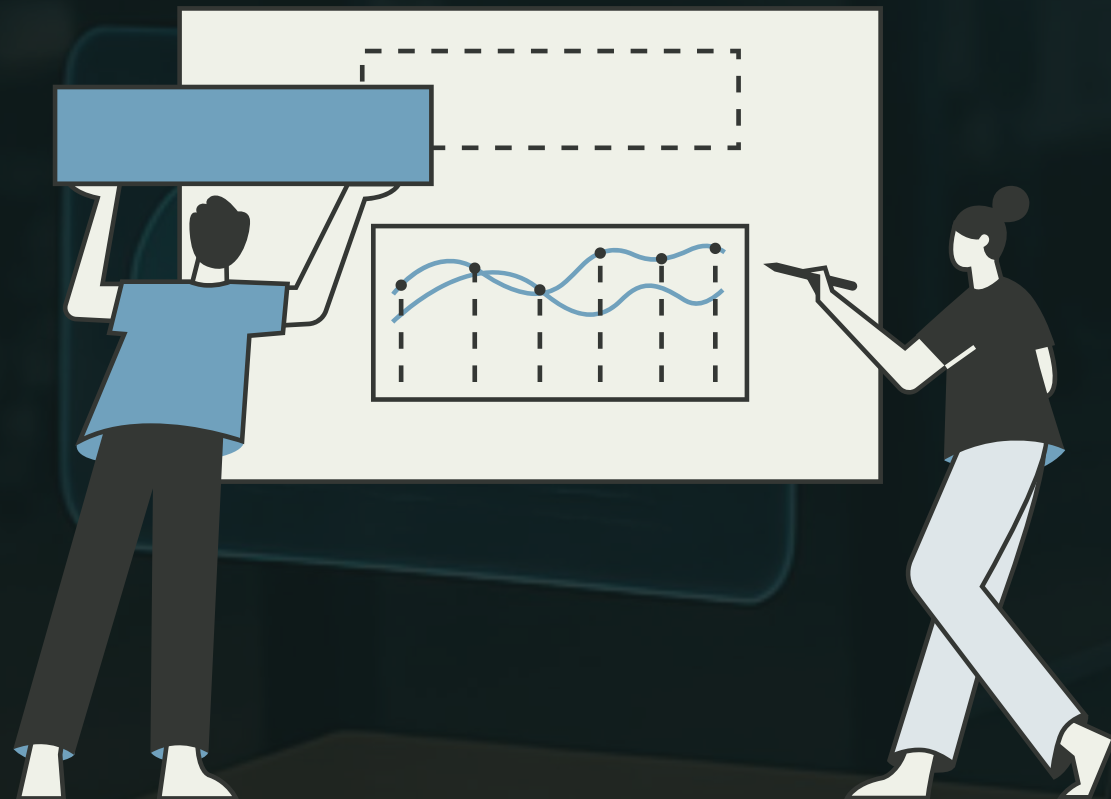

Recommended Actions

- Provide premium customer support.
- Introduce personalized financial advisory services.
- Offer exclusive banking benefits
- Create retention programs for premium customers.
